

# Less contact for more comfort

## Philips Respironics AP111 nasal interface

When chronically ill patients enter the hospital in respiratory distress, they may prefer a noninvasive ventilation (NIV) interface as comfortable as what they use at home - an unobtrusive system to maintain quality of life during their hospital stay. The AP111 cushions contact only the outside of the nares, and the small frame allows patients to read with unobstructed vision. The versatility, freedom, and comfort of the Respironics AP111 make it an excellent option for long-term and chronic care situations.

### Key advantages

- Easy sizing and fitting
- Complete kit for quick set up
- Clear field of vision

**PHILIPS**  
sense and simplicity
